Revised 11/11/2019

### 2009 Tiguan Service Reminder Reset

#### Service interval display on vehicles with time- or distance-dependent service reminder

When scheduled maintenance service is due soon, a **pre-service notice** is displayed as a “wrench” symbol along with “mi” (“km”) and the number of miles (kilometers) you can drive until service is due. After about 10 seconds, a “clock” symbol is displayed with the number of days until service is due. The following display appears in the instrument cluster: **SERVICE IN ---MILES OR ---DAYS**. About 20 seconds after the ignition is switched on or with the engine running, the service message disappears. You can also switch to the normal display by pressing the rocker switch (where applicable) on the windshield wiper lever or the arrow keys on the multi-function steering wheel (where applicable).

When your vehicle needs scheduled maintenance, when there is **service due**, a chime sounds, the flashing “wrench” symbol appears for about 20 seconds, and **SERVICE NOW** is displayed in the instrument cluster.

With the ignition on, you can scan the current **service message** at any time by briefly pressing the rocker switch (where applicable) on the windshield wiper lever or the arrow keys on the multi-function steering wheel (where applicable).

**Overdue service** is shown by a minus sign (–) in front of the distance or number of days.

## 2009 – 2011 Tiguan

### Resetting the service interval display

If the maintenance service was **not** done by an authorized Volkswagen dealer or a qualified workshop, the service interval display system should be reset by your authorized Volkswagen dealer or a qualified workshop.

#### Tips

Do **not** reset the service interval function between scheduled maintenance intervals; doing so will result in an incorrect display.

### 2010 Tiguan Service Reminder Reset

#### Resetting the service interval display

If service was not performed by a Volkswagen dealer, the display must be reset as follows:

- Use the rocker switch on the windshield wiper lever or the buttons in the multi-function steering wheel (where applicable) to select the Settings menu.
- In the Service submenu mark the Reset menu item and press the  button in the windshield wiper lever or the multi-function steering wheel (where applicable) to reset the service interval display. Confirm the subsequent security check with .

#### Tips

- If you reset the service display yourself, the next service is displayed after 9,320 miles (15,000 km) or one year. The service interval is not determined individually.
- Do not reset the service interval function between scheduled maintenance intervals; doing so will result in an incorrect display.

### 2011 Tiguan Service Reminder Reset

#### Resetting the service reminder display

If the service was not performed by an authorized Volkswagen dealer or an authorized Volkswagen Service Facility, the service reminder can be reset as follows:

---

#### Vehicles with text message display:

---

Select the **Settings** menu.

---

In the **Service** sub-menu, select the **Reset** menu item.

---

Confirm request with .

---

Volkswagen

## 2009 – 2011 Tiguan

---

### Vehicles without text message display:

---

Switch off the ignition.

---

Push **0.0 / SET** and hold down.

---

Switch on the ignition.

---

Release the **0.0 / SET** button and push the  button within about 20 seconds.

---

Do **not** reset the service reminder between service intervals; otherwise, incorrect information will be displayed.

The service reminder disappears after a few seconds when the engine is running or the **OK** button has been pushed.
