Service

When replacing a **-J519-** Vehicle Electrical System Control Module (BCM), part number 5K0 937 **085** (regardless of suffix or color code), with part number 5K0 937 **087** (regardless of suffix or color code), the coding of the module may need to be changed.

Faults 00984 and 00985 may be stored static in the replacement **-J519-**. To recode the **-J519-**, change BCM hex byte 18 from 00 to 06 for Sedan or 09 for Sportwagen. All other hex bytes from the original **-J519-** coding should remain unchanged. Remember that hex byte count starts with 0, so byte 18 is actually the 19th byte listed.
