Technical Background

If the green light of the Telematics Control Head -**E264**- above the rear-view mirror does not come on within approximately 15 minutes after completion of the ePDI process and has been taken outside with clear line of sight to the sky, reference the following.

Service

Part 1. (With the ignition OFF)

1. Open the driver door.
2. To the left and below the steering wheel, open and remove the pull out compartment door (Approx 4"x 6") by pressing the detent lever inside/above, exposing the fuse box.
3. Observing the fuses, starting from the upper left corner, the second row down, 3rd slot over (there may or may not be a fuse in the first slot so count carefully), remove the 7.5 fuse, at location SC17 (Figure 1.)
4. Wait 5 minutes with the fuse out to allow the Control Module for Emergency Call Module and Communication Unit -**J949**- internal backup battery to completely discharge.
5. Re-insert the fuse into the slot and reinstall the pull out door.

Part 2.

1. Turn the vehicle ignition on and allow the vehicle to run for 15-20 minutes outside, with clear line of sight to the sky.
2. After 20 minutes, observe the 3 button Telematics Control Head -**E264**- above the rear-view mirror and determine if the green light is on.
3. If the green light still has not come on, please call 833-982-2048 the new Car Net 2.0 Dealer Support center for technicians.
