Issue: Audi is releasing a software calibration update to the Approved Emissions Modification (AEM). This software calibration will include the following changes to the vehicles' emissions control and on-board diagnostics (OBD) software: (1) It will correct an issue that is causing the "check engine" light to falsely illuminate under certain driving conditions, which has resulted in replacement of the diesel oxidation catalyst (DOC) for certain customers; (2) It will reduce the likelihood of experiencing an engine shudder that could occur during certain warm-up driving conditions; and (3) It will improve OBD monitoring of vehicle emissions systems and otherwise improve the software used by your vehicle.

Repair:

- REPAIR AVAILABLE – January 07, 2020 - Update the engine control module (ECM) software calibration.
- See ELSA/ServiceNet for complete repair & claiming instructions
- Check daily campaign open inventory report or OMD for affected vehicles in inventory
- Repair every affected inventory vehicle before delivery to consumers.
- **This AEM-C MUST explicitly be elected by the customer and be clearly marked on the repair order PRIOR to commencing the update.**
- **This AEM-C only applies to vehicles that have received the Approved Emissions Modification (AEM).**
- **Dealers MUST provide a copy of the customer letter (found in the campaign circular) to each customer who presents their vehicle for repair under this AEM-C.**
- **If a vehicle has not yet received the AEM, this AEM-C does not apply.**

IMPORTANT!
This AEM-C ONLY applies to vehicles that have already received the AEM

Parts Department:

Software update only; no parts needed.
