Freightliner Service Bulletin

Description of Revisions: *This bulletin replaces the version dated 02/04/2019. Safety information has been updated.*

General Information

Only H11 bulbs with a 55W rating should be used on New Cascadia vehicles equipped with halogen headlamps. Installing higher-wattage bulbs may damage the headlamp housing or the wiring. It is recommended that you only install DTNA-supplied original equipment (part number SYL H11LL12V55W).

For headlamp bulb replacement instructions, refer to **Section 54.04, Subject 110** in the *New Cascadia Workshop Manual.*

Starting on 10/21/2019, two warning labels were installed on every halogen equipped New Cascadia vehicle. See **Fig. 1.**
