Improved part identification

- (1) Improved rubber plug design
- (2) Former rubber plug design
- (3) Slot in the former rubber plug design
- (4) Tapered surface on the improved rubber plug design
- (5) Flat surface on the former rubber plug design

The improved part can be identified by observing the rubber plug.

The former part has a slot at the base. The improved part does not.

The former part is flat at the cap end. The improved part is tapered.
