

# WKK8 Workshop campaign - Replacing remote controls and teaching new remote controls

Version 12

---

## **Update 12/30/19**

An updated VIN list is now attached with additional shipped vehicles.

---

## **Update 12/20/19**

An updated VIN list is now attached with additional shipped vehicles.

---

## **Update 12/18/19**

Please note an additional Scope has been added for painted and leather key faces. Updated work instructions are attached.

**Additionally, an updated VIN list is now attached with additional shipped vehicles.**

---

---

## **Important Update 12/17/19 - Reactivation of WKK8 Workshop Campaign**

All dealers with incorrect Taycan Remote Key assignments have been individually contacted by PCNA Parts Support on December 13-14 and provided shipping labels and instruction for key return.

All other Remote Keys from this initial shipment were assigned and shipped to the correct dealer/VIN.

**With this information, the WKK8 Workshop Campaign is now reactivated and may be carried out for Taycan vehicles that are arriving or have already arrived.**

Dealers can cross reference VIN with order number in PPL to ensure correct key to vehicle assignment.

Note: the attached VIN list will be updated each day that additional vehicles have shipped from port.

---

---

## **Important Update 12/13/19 - Temporary Suspension of WKK8 Workshop Campaign**

Please be advised that there has been a change in the number of available Taycan vehicles that can be assigned at each port.

Due to this new information, the VIN / Dealer list previously attached to this post is now inaccurate and has been removed.

In some cases this means that dealers are now in possession of the wrong Remote Key parts, as they are pre-coded to VIN at PDC.

Updated information will be provided to you via this post when available, regarding next steps. At this time, please do not attempt to carry out this workshop campaign until further instructed to do so.

**All updates will be made via this space in PPN.**

---

---

## Update: 12/12/19

An updated VIN list for WKK8 is now available and attached to this post. 3 additional VINs have been assigned to dealer numbers and these Remote Keys will be pre-coded and shipped from the Ontario PDC today.

**Note:** WKK8 Remote Key parts may arrive prior to vehicle arrival to your dealer. If this is the case, there is no need to contact the Ontario PDC. Please perform the WKK8 campaign once the vehicle and parts arrive.

This post will be updated with a new VIN list each time new keys are shipped.

---

## Update: 12/10/19

Please be advised that the first batch of WKK8 Workshop Campaign Remote Keys for Taycan arrived to the Ontario PDC this morning, were pre-coded to VINs and mailed today for the first 66 dealer vehicles.

Additional Remote Keys will be coded at PDCs and mailed to dealers as they become available, prioritized by which vehicles will arrive to dealers first (starting with settlement states).

This post will be updated with a new VIN list each time new keys are shipped.

---

## Additional Information: 12/9/19

Please note that the attached VIN list will be updated to include dealer number once VIN assignments have been determined.

# WKK8 Workshop campaign - Replacing remote controls and teaching new remote controls

## Overview

There is a possibility that the keyless Comfort Access function "open on approach" does not work as specified on the affected vehicles.

Due to this, the remote controls must be replaced and new remote controls have to be taught to be recognized by the vehicles.

Please arrange for this measure to be carried out as the affected vehicles arrive to your dealer.

<b>Model type</b>	Taycan (Y1A)
<b>Model year</b>	2020
<b>Number of affected vehicles</b>	304

## Parts required

Part No.	Designation	Quantity/vehicle	Parts return
9J1959753AC	Handheld transmitter	2 ea.	No

### General information about the parts handling:

- Parts will be automatically allocated for each **affected** inbound Taycan assigned to your dealer.
- Please do not order additional parts, as orders will be denied.
- To easily identify the keys, PCNA will use the affected vehicle's VIN as your dealer's PO number in PPL.
- The affected remote controls should be scrapped or recycled directly.
- The required parts (9J1959753AC) are being processed and shipped from the Ontario PDC.
- Orders will be entered and begin to ship in calendar week 50.

## Remedial measure

Please find the preliminary work instructions attached

## Warranty processing

Do **not** enter the campaign into the Warranty and Maintenance booklet

Scope 1: Replace remote controls and teach new remote controls.

Damage code	WKK8 66 000 2
Working time	61 TU

**Further information**

<b>Work instruction</b>	See attachment
<b>Vehicle list and allocation</b>	See attachment
