

**** SOLUTION ****

Title Mack Chassis - **Differential Carrier Models CRD 125 And CRD 150** - New Differential Axle Seal Installation Tool; New Tool Required For New Input And Output Seal Installation

Mack Models

Mack Model LEU , LR , MRU - TerraPro , TE - TerraPro , AN - Anthem , CHU - Pinnacle, Axle back , CXU - Pinnacle, Axle front , GR - Granite , GU - Granite , PI - Pinnacle , TD - Titan , CH , CHN , CL , CT , CTP713 , CTP713B , CV , CX , CXM , CXN , CXP 612 , CXP613 , CXU613 , DM , DM6 , DMM , FDM , LE , LE , MH , MR , MR6 , RB , RB6 , RD , RD6 , RD8 , RM6 , RW6 , RW7

**** SOLUTION ****

Cause Changes have been made to both the input and output seals for Mack carrier models CRD 125 and CRD 150. The new seal design requires new tooling to properly install.

At this time, the Special Tools needed for the new seal installation will not be available until the first quarter of 2020.

Solution Refer to the chart below for current Input and Output Seal availability:

Input/Output Seal	P/N	Notes
Old Output Seal	25624317	Available
New Output Seal	23396652	Currently Unavailable
Old Input Seal	25623960	Available
New Input Seal	23421718	Available

AT THIS TIME: Until the new installation tools are available, utilize the old style Input Seal /Output Seals and install using current published installation procedures. New seals should only be used if an old style part cannot be located.

This solution will be updated as more information becomes available.

Internal comments (FO) Fruedenberg supplies the old & new seals - we are attempting to obtain more of the Old Input Seals...

These seals were released early by GTO outside of GTT knowledge!
