RE: Scramble Activity Request for TPMS Light On Issue (Mirage/Mirage G4) - Revised  
TIN NO. TIN-19-31-001REVII

.....

This TIN supersedes TIN-19-31-001REV, issued May, 2019, to add 2020 model year Mirage and Mirage G4 vehicles, and to update MMNA contact information.
---

**AFFECTED VEHICLES:** 2014 – 2020 Mirage, 2017 – 2020 Mirage G4

**ATTENTION:**

MMNA is releasing this TIN again to remind all dealers to call in for TPMS concerns on Mirage and Mirage G4. **MMC/Japan wants to perform an onsite inspection of a vehicle exhibiting this condition as soon as possible.** Please contact Maxwell Sweet at MMNA when you encounter such a case.

**PURPOSE**

MMNA is looking for a scramble opportunity on a Mirage or Mirage G4 that displays "TPMS light on" issue with "tire ID reception fail" DTC. If the vehicle has C1911, C1921, C1931, or C1941 (either active or stored), please stop your diagnosis and create a Techline case. Then, contact the MMNA associate below and he will guide you with further questions and instructions.
