2020	NX300H	2020	ES300H
2020	RX350	2020	ES350

CONDITION

Some 2020 model year vehicles equipped with a DCM may exhibit a B15A804 DTC in current or history during PDS. This DTC can be triggered during the manufacturing and/or shipping process and does not indicate a problem with the vehicle. To simplify the diagnosis of this DTC, refer to the procedure below to prevent unnecessary parts replacement.

RECOMMENDATIONS

Is the DTC current or a history DTC?
- History – Clear the DTC
- Current and red SOS light is on - Disconnect the 12V battery for 30 minutes to reset/initialize the DCM
    - If the green SOS light is on, normal operation has been restored
    - If the condition has not changed, please diagnose per the repair manual.
