

Preliminary Information

PIC6290C Brake Thump Bump Feel or Noise When Braking

Models

Brand:	Model:	Model Years:	VIN:		Engine:	Transmissions:
			from	to		
Cadillac	CT6	2016 - 2020	All	All	All	All

Involved Region or Country	North America
Condition	Some customers may comment of a thump, bump , or noise during sudden brake application with no steering wheel angle. Condition is more noticeable at low vehicle speeds, coming to a stop, and slightly letting off brake and then re-applying the brake.
Cause	After a thorough investigation, Engineering has determined this is a normal operating characteristic.

Correction:

Do not replace any parts, this is a normal operating characteristic.

Customer Information

Please communicate to the customer, this will not affect the safety or reliability of the vehicle.
