

POLARIS®

DATE: September 23, 2019

SUBJECT: Digital Wrench 4.1 BASE Version Software Update

MODELS: All Model Year 2020 Vehicles - North America Only

PURPOSE:

Digital Wrench version 4.1 is now available for download. Updating to version 4.1 is required to update the base Digital Wrench software version from 4.0 to 4.1 to allow for future MY20 vehicle support. This update is included in the annual technology fee that will be administered in December.

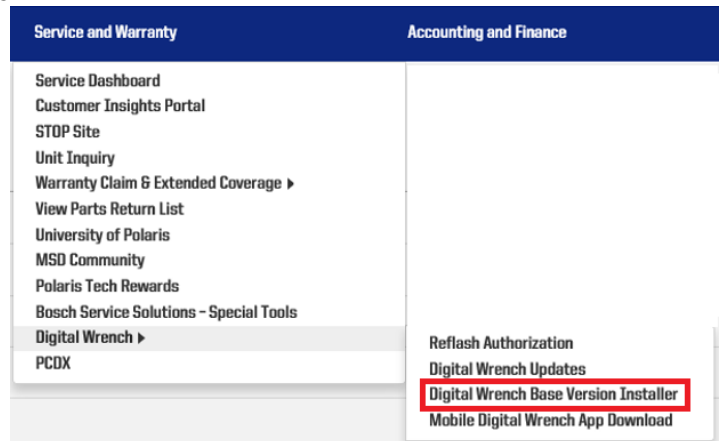

MY20 vehicles are only compatible with Digital Wrench 4.1. Digital Wrench 4.1 will allow you to:

- Connect and diagnose a model year 2020 vehicle.
- Generate Service Reports, which is the recommended process when completing the 'Test Ride' portion of the PCDX process.

NOTICE: Digital Wrench 4.1 support for MY20 product is nearing completion and will be released as a version 4.1 update in the near future.

HOW TO DOWNLOAD DIGITAL WRENCH 4.1 BASE Version:

1. Log in to your Polaris Dealer website.
2. Click on "Service and Warranty".
3. Click on Digital Wrench.
4. Click on "Digital Wrench Base Version Installer".
5. Download the Digital Wrench 4.1 BASE Software.
6. Install Digital Wrench 4.1 BASE on your shop's primary diagnostic computer(s).
7. Repeat steps 1 and 2. Click on "Digital Wrench Updates".
8. Click on "Digital Wrench Version 4.1 Updates".
9. Download the most current update software. **NOTE: The current update as of the release of this communication is 4.1 09/23/2019.**
10. Install the Digital Wrench 4.1 update on your primary computer(s).

GENERIC PRODUCT LINE / GENERIC VEHICLE DESCRIPTION:

Before the full model list is released in version 4.1, select Generic / Generic Vehicle to connect to any model year 2020 vehicle that is not listed under its respective product lines.

Notice: Selecting Generic Vehicle provides the capability to view diagnostic trouble codes and create service reports but is not be able to perform ECU replacement or ECU reflash functions.
