Detroit Engine Up-Rate Capabilities Saf-T-Liner C2 & HDX

We continue to grow and build our knowledge of the Detroit engine features. With this in mind, we want to share with you information that we recently confirmed regarding the ability to up-rate engine horsepower after build with a software change. The table below summarizes the information we now have regarding our Detroit engine offerings.

We encourage you to merge this new information into your discussions with customers regarding the product. We will identify this information in marketing material moving forward and have added this to the RACE option description in the configurator.

Your Regional Sales Manager has specific dealer information containing a list of vehicles impacted. Contact your Regional Sales Manager for this information.

Engine Specification	Up-rate Capability
DD5 200 hp./560 lb.-ft. torque	Not available
DD5 220 hp./560 lb.-ft. torque	Available
