## ESC Update Saf-T-Liner C2

All new, non-LPG (propane) powered Saf-T-Liner C2 vehicle orders equipped with hydraulic brake systems submitted on or after **06/21/2019** will be required to include Electronic Stability Control (ESC) as **standard** equipment.

This includes both school and non-school equipped with hydraulic braking systems.

All **Canadian** orders, school and non-school, equipped with hydraulic systems started **08/01/2019** and later, must by **CMVSS** mandate, be equipped with **ESC**. TBB scheduling is ensuring we comply with this mandate.

All **US** orders, school and non-school, equipped with hydraulic braking systems, will have **ESC** as standard if started **08/01/2019** or after.

**NOTE:** LPG (propane) powered Saf-T-Liner C2 chassis are not available at this time with ESC.

Below is a summary of changes that will take effect in **RACE** on **06/21/2019**.

| Feature    | Description                                 | Action    |
|------------|---------------------------------------------|-----------|
| FL-490-117 | WABCO NG HYDRAULIC ABS/ATC W/SHUTOFF SWITCH | Released. |
