

The standard front grille on our Saf-T-Liner C2 will change from painted plastic (Argent Silver) to Mold-in Color (Black) injection molded material for orders received on and after 10/1/2019. This new mold-in technology introduces key benefits in both product appearance and durability which are listed below. Painted plastic grilles in Argent Silver and School Bus Yellow will still be available to order as optional equipment. Pricing changes for these options will be applied to orders received on and after 10/1/2019. Change requests for your current orders will be subject to lead time constraints.

The new standard black mold-in color grilles provide the following benefits:

- Meets UV protection standard
- Improved color retention
- Better chip resistance
- Isolating mounting hardware for improved durability.
- Ability to retrofit to previous hoods
- Matching black standard front grille and standard black hood mounted air intake

Feature	Description	Feature Status as of 10/1/19
