

New Release

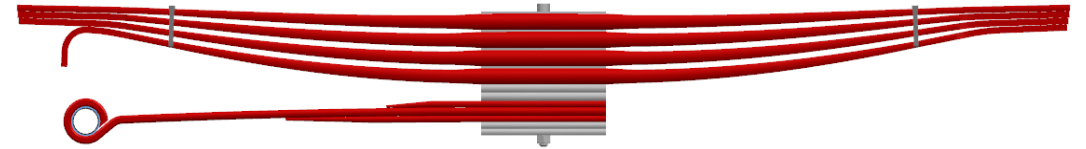

We are pleased to announce that Hendrickson tapered leaf springs rated at 19K and 21K are now available for order on your Saf-T-Liner C2. This improved spring design provides a higher quality product with a more consistent ride comfort. Sales options are available now for new orders. Approval of change order requests will be subject to lead time constraints.

23K tapered spring design is tentatively scheduled for release in Q1 2020.

Features and Benefits

- Lighter weight due to decreased spring leaf count
- Better paint process due to spring leaf spacing
- Eliminating inner leaf friction reduces the risk of removing paint from the surface of the lower and upper springs helping to maintain corrosion resistance
- Spring rate should be more consistent over the life of the vehicle by reducing spring-stiffening rust
- Greater ride comfort due to reduced dynamic spring rate as compared to the current multi leaf spring design

Ordering

Options	Description	Feature Status as of 9/27/19
