## Window Function after Module or Motor Replacement

<b>Model(s)</b>	<b>Year</b>	<b>Eng. Code</b>	<b>Trans. Code</b>	<b>VIN Range From</b>	<b>VIN Range To</b>
Beetle, Beetle Convertible	2014-2015	All	All	All	All

## Technical Background

Window does not operate correctly after door module replacement.

Applicable after replacement of a door power window control module or window motor **-J386-**, **-J387-**, **-J388-**, **-J389-**, where the windows do not operate correctly. Auto up, auto down, short drop are some of the functions possibly affected.

## Service

It will be necessary to code the new motor-module(s). Code the driver's door 00 10 A4 and passenger door 10 10 A4 (as necessary).

After coding:

- Turn the vehicle OFF, cycle the door locks with the remote and then retest operation.

To code manually:

- Right click on AW09 (**-J519-** Vehicle Electrical System Control Module) and select Control Module OBD. Select coding and click to perform. Check the bottom of the coding screen for a tab that indicates "binary coding".

If present:

- Press select.

Go to the top left corner of the coding screen, find the drop down box that currently indicates BCM **-J519-**.

- Open the drop down and click on **-J386-** (Driver Door Control Module) or **-J387-** (Passenger Door Control Module), as necessary.

Now the screen will show the coding of the respective door module. Use the fourth column from the left, titled, Hex Input“.

- Click the row of the byte that needs to be changed in this column.

In the pop up box:

- Change the coding to the new Hex number and click apply. After all bytes are changed, click on the apply button in the lower left corner.
