Subject: Updated list of models involved in Ferrari Predictive Maintenance program

Please note that the newly introduced **F8 Tributo** is automatically included in the **Ferrari Predictive Maintenance** program. Furthermore, the replacement interval indicated in the **maintenance schedule** for the engine oil and the relative filter has also been modified.

Specifically, the time-based interval for replacing the engine oil has been increased from **12** to **24** months, whereas the maximum permitted mileage for replacement remains the same as before (**12,500miles/20,000 Km**). All supporting documentation will be updated accordingly. The new interval has already been entered in the **Ferrari Predictive Maintenance** system, which will propose the date for replacing the engine oil and the relative filter within the revised time window in accordance with the effective usage of the vehicle itself.

The revised list of models which may voluntarily be registered in the program or which are already sold with the standard plan, which includes them automatically in the **Ferrari Predictive Maintenance** program, is given below.

Maintenance plan with component wear calculation system

Model	Voluntary subscription	New standard plan
California	X	
California T	X	
F12berlinetta	X	
F12 TDF	X	
FF	X	
458 Italia	X	
458 Spider	X	
458 Speciale	X	
458 Speciale A	X
