

CAMPAIGN LAUNCH STATUS

N405-20MY L405 & L494 TRANSMISSION SHIFT QUALITY

UPS N405 STADA (Transmission Static Adaptions)

AFFECTED MODELS	20MY RANGE ROVER & RANGE ROVER SPORT
NAS VOLUME AFFECTED	US
REPAIR	Transmission Control Module shift adaptions software required to improve shift quality
REPAIR TIME	0.3hrs inclusive of short road test
LAUNCHED	December 13 th , 2019
Notes	Update Prior to Sale

- To improve early life transmission shift quality, affected vehicles require a new software transmission shift adaptation application to be run with Pathfinder at PDI or prior to delivery.
- The application can be run with a static vehicle but requires the vehicle require a short pre-drive to ensure bulk oil temperature is at least at 140 deg F. The standard PDI road test will achieve this.
