Title	Mack Chassis - Granite (GR) Models Equipped With An Allison Transmission And Split Box PTO - "Release Parking Brake" Message Present In Instrument Cluster When Parking Brake Is Released - Model Year 2018 And Newer
-------	---

Mack Models

Mack Model	GR - Granite
-------------------	--------------

Transmission

Transmission	Allison
--------------	---------

**** SOLUTION ****

Cause	Certain Granite chassis have been found to display a "release parking brake" message in the instrument cluster when the parking brake is released.
--------------	--

It has been found that this is occurring following an update to the VECU software due to a bug in the software itself.

Solution

If a vehicle presents with the configuration and symptoms above:

The VECU software will have to be rolled back to a previous version. Dealer Technical Support should be contacted via eService case for this correction to be applied.

A thorough description of the issue should be included when the case is opened.

A software fix is expected to be released in the coming weeks, as of 31 January 2020.

Function(s)/component(s) affected

Function affected	parking brake
-------------------	---------------

Function Group

Function Group	5 brake
----------------	---------
