TECHNICAL

Subject: Rattle Noise from Rear of Vehicle and/or Wind or Buffeting Noise While Driving with One Window Lowered

Brand:	Model:	Model Year:		VIN:		Engine	Transmission:
		from	to	from	to	Engine:	fransinission.
Chevrolet	Camaro	2016	2020			All	All

Involved Region or Country	North America, Europe, Russia, Middle East, Argentina, Brazil, Bolivia, Chile, Colombia, Paraguay, Uruguay, Japan, GM Korea Company, China
Condition	Some customers may comment on a wind or buffeting noise that is heard in the vehicle cabin while driving with one window lowered and/or a rattle type noise from the rear while driving.
Cause	The cause of the condition may be the two flap design of the original pressure relief valves in the rear of the vehicle.
Correction	Verify the condition and replace both original body pressure relief valves with a four flap design valve, following the Service Procedure below.

Service Procedure

Note: The noise can generally be duplicated by driving at speeds greater than 48 km/h (30 mph), with one window lowered. If another window in the vehicle is lowered, even slightly, the buffeting noise will stop instantly.

For vehicles exhibiting this condition, replace both of the original body pressure relief valves (1) with two of the four-flap design valves listed in the Parts Information table. Refer to *Body Pressure Relief Valve Replacement* in SI.

Version	2
Modified	Released on April 25, 2017 January 22, 2020 – Added the 2018-2020 Model Years, updated the Involved Region or Country section and updated the Condition to include Rattle Noise.

GM bulletins are intended for use by professional technicians, NOT a "<u>do-it-yourselfer</u>". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, <u>DO NOT</u> assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
