**Freightliner  
 Service Bulletin**

## General Information

Vehicles equipped with an APS3 steering gear require calibration when an axle alignment is performed. Calibration is also needed when servicing any steering or suspension components, frame extension bracket or wheels or tires. For calibration procedures, refer to **Section 46.09, Subject 105**, 'Active Power Steering (APS) Calibration' of the *New Cascadia Workshop Manual*.

## Warranty

This is an informational bulletin only.
