## Engine Oil Specification

Date: 23/01/2020  
Bulletin MAS002103  
Section: Vehicle Data

MASERATI

**Models:** SEDAN & SUV.

**Description:** the engine oil specification has changed during the years for both petrol & diesel engines so it's important to have a complete summary.

The table that is summarizing the changes is the following:

ENGINE OIL SPECIFICATION			
Model Year	Diesel	V6 Petrol	V8 Petrol
MY14 & MY15	5W-30*	5W-40	5W-40
MY16	5W-30*	5W-40	5W-40
MY17	5W-40	5W-40	5W-40
MY18	5W-40	10W-60	5W-40

\*Until the release of Circular Letter MAS001005 of 30.09.2016 (engine oil replaced with SAE 5W-40 specification).

### **V6 DIESEL ENGINE – CIRCULAR LETTER MAS001005**

On MY17 V6 Diesel engines, new engine oil specification **SAE 5W-40** has been introduced instead of **SAE 5W-30** specification.

- On M161 starting from engine SN #64D001948 produced on 13/07/2016.
- On M156 & M157 starting from engine SN #46D055094 produced on 13/07/2016.

New engine oil specification is extended to all previous MY.

Consequently, from now on and for any intervention, it's mandatory to use engine oil with **SAE 5W-40** specification.

Suggested engine oil: **SHELL Helix Ultra 5W-40**.

### **V6 PETROL ENGINE – CIRCULAR LETTER MAS001306**

On V6 gasoline engines, the engine oil with **SAE 10W-60** specification has been introduced instead of **SAE 5W-40** starting from MY18.

Consequently, for any intervention, it's mandatory to use engine oil with **SAE 10W-60** specification.

Previous MY will maintain engine oil with SAE 5W-40 specification.

Suggested engine oil: **SHELL Helix Ultra Racing 10W-60**.

**Actions:** wrong engine oil specification usage will deny the warranty so make sure to use correct one.
