Subject: Diagnostic Tip for Malfunction Indicator Lamp (MIL) Illuminated - DTC P0171 P0174 Set

Brand:	Model:	Model Year:		VIN:		Engine:	Transmission:
		from	to	from	to		
Chevrolet	Colorado	2017	2020			LGZ	
GMC	Canyon						

Involved Region or Country	North America
Condition	Some customers may comment on the MIL illuminated. Some technicians may find one or more of the following DTC's set: <ul style="list-style-type: none"> • P0171 • P0174
Information	If you encounter a vehicle with the above concern, check for a vacuum leak at the PCV fresh air tube or the foul PCV tube attachment under the air cleaner outlet duct or at the intake manifold.

Service Procedure

4915133

2. Remove the engine rear noise shield. refer to Engine Rear Noise Shield Replacement in SI

4915265

1. Using care, inspect the PCV fresh air tube connection (1) at the Air Cleaner Outlet Duct.
 - If a leak was found, connect the tube to the air cleaner duct port and no further repairs are needed.
 - If the tube is secure, validation of the foul PCV tube must be done.
3. Using care, inspect the PCV foul air tube connection (1) on the rear side of the intake manifold vacuum port (2).
 - If a leak was found, connect the tube to the vacuum port and no further repairs are needed.
 - If no issues were found at either location, refer to SI for further diagnostics.

Parts Information

No parts are required for this repair.
