REVISION NOTICE

February 07, 2020 Rev1:

- The entire bulletin has been updated.
- Any previous printed versions of this bulletin should be discarded.**

Introduction

An initialization procedure is required to activate the Entune™ 3.0 App Suite Connect for Audio, Audio Plus, and Premium Audio head units before they are used for the first time on new vehicles. The initialization procedure may also be performed under other circumstances, such as following a head unit replacement or after the customer's personal settings are erased.

The initialization procedure requires between 3 and 15 minutes to complete, depending on file size, cellular connection speed, and other factors. Connection to a wireless network is recommended for optimal functionality when downloading software via a smartphone. Download the latest Entune™ 3.0 smartphone app on a smartphone. Following the initialization procedure, individual Entune™ 3.0 apps may periodically update through an over-the-air update system. Updates are optional or mandatory. The update procedure will take approximately 1 minute for each app requiring an update. Follow the Initialization/Update Procedure in this bulletin to perform the initialization and app updates.

NOT Equipped With an SOS Button	Smartphone Required for Activation
Equipped With an SOS Button	Smartphone NOT Required for Activation

NOTE

An Entune™ 3.0 compatible smartphone and an active Entune™ 3.0 account are required to perform initialization or updates for Entune™ 3.0 models NOT equipped with a DCM (Data Communication Module). For these vehicles, the paired smartphone is used to download the software required for the vehicle update.

1. Refer to the [Toyota Bluetooth® Compatibility Information](#) link at *TIS – Diagnostics – Telematics* to verify smartphone compatibility.

NOTE

Connect the smartphone to a wireless network for improved speed of installation and to avoid data charges.

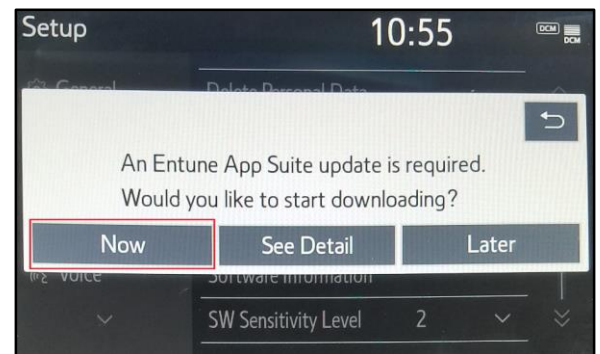

2. Connect the smartphone to the vehicle via Bluetooth® by following the steps outlined in the Quick Pairing instructions in TIS.
3. Open Entune™ 3.0 App Suite Connect on the smartphone and sign in with your Toyota Owner’s account or a guest user account.
4. Select Now when the “Would you like to start downloading?” pop-up displays.

NOTE

The pop-up notification will appear on the head unit when:

- The smartphone is paired on an Audio model.
Or
- Ignition “ON” is performed on a vehicle with Audio, Audio Plus, or Premium Audio (smartphone NOT required).
