

We have this new unit that was just picked up at my Sacramento store last week. The customer drove it straight to me and there is hole in rear of the canvas top where the strut bracket is and its rubbed hole in it. Also the front plastic window is poorly creased and in bad shape and scratched. Can this be covered under warranty and if so then how do we install new? Looks like quite the project.

10.0 hours approved and we will send you a new tent canvass under warranty. Please do not order.
