

SSM 48602 - 2020 F-Super Duty - Incorrect Or Missing Factory Invoiced Accessory (FIA) Trailer Camera Tire Pressure Monitoring System (TPMS) Kits

Some 2020 F-Super Duty vehicles were shipped with incorrect FIA trailer camera/TPMS kits and some vehicles ordered with the Trailer TPMS only kit did not ship with the kit. The only accessory trailer kit which can be used on 2020 vehicles is the Trailer Camera only kit HC3J-1A515-CC. Do not attempt to install kits (HC3J-1A515-AC or BC) with trailer TPMS. Vehicles equipped with fifth wheel prep pack and Pro Trailer Backup Assist should install the provided trailer yaw sensor kit 14G551 and plug the yaw sensor wiring into the 12-way bed connector. The trailer camera only kit that shipped with the vehicle can be installed as it connects to the bumper mounted 7/12 trailer connector provided. Follow Super Duty Owners Manual Park Aid section to display trailer Auxiliary Camera view. Trailer TPMS only kit is still unavailable. Monitor OASIS for updates.
