

L560 Check Engine MIL

2018 Onward RR Velar

Customer Voice:

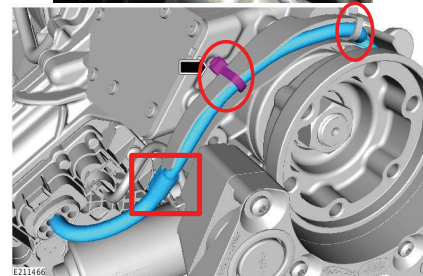

- The Check Engine MIL is on.

Technical Description:

- Various DTCs for oxygen sensors may be present depending on the damage to the harness.
- Visual inspection finds the harness is damaged due to contact with the driveshaft.

Status:

- Make repairs to the harness as necessary.
- Make sure the harness is secured into the bracket with two cable ties in the locations denoted by the ovals and tape in the location noted by the square in the image to the right.

PRINTED COPIES ARE UNCONTROLLED
