TOL NOTICE (US&CAN) – March 3, 2020

TOL Ref. # 13916-PAC

My Triumph Connectivity System Now Available For New Street Triple RS & Tiger 900 Models

Triumph Motorcycles is pleased to confirm the full availability of the innovative My Triumph Connectivity System for Street Triple RS, Tiger 900 GT and Tiger 900 Rally models. Beginning immediately, customers can visit their authorized Triumph dealer in order to purchase and have the My Triumph Connectivity System fitted to their model-year 2020 Triumph Street Triple RS, Tiger 900 Rally or Tiger 900 GT.

Required parts for fitment include:

- **My Triumph Connectivity Module – (A9820200)**
- **Tiger 900 Fitting Kit – (A9820098)**
- **Street Triple RS Fitting Kit – (A9828051)**

MY TRIUMPH TFT CONNECTIVITY SYSTEM

The My Triumph Connectivity System sets a whole new benchmark in motorcycle connectivity, designed to deliver an enhanced rider experience with a host of class-defining connectivity features.

The My Triumph Connectivity System is now available for the following models:

- New Street Triple RS (newly available)
- New Tiger 900 Rally (newly available)
- New Tiger 900 GT (newly available)
- Rocket 3 R
- Rocket 3 GT
- Scrambler 1200 XC
- Scrambler 1200 XE

My Triumph Connectivity System features and benefits:

- Motorcycle integrated GoPro control system
- Turn-by-turn navigation system built with Google (Google's first partnership with a premium motorcycle manufacturer)
- Music & phone operation
- Class-defining capability for enhanced rider experience

Intuitive operation and rider functionality:

- All features facilitated by an accessory My Triumph Connectivity module
- All features accessed and managed by the rider via the TFT instruments
- Turn-by-turn navigation supported by a free 'My Triumph' app, which is available for Android™ and iOS™ compatible mobile phones
- Owners will need to visit their Triumph dealers to have the accessory My Triumph Connectivity module fitted and the system software applied.

Motorcycle Integrated GoPro Control System

The My Triumph Connectivity System features a motorcycle integrated GoPro control system, functionality which is only available from Triumph. The rider can capture every moment of their ride by connecting their GoPro to the TFT display where they can intuitively access and control key GoPro functions through the motorcycle's TFT instruments and left hand switch cube.

The TFT instruments display simple graphic icons on the screen, indicating the status of GoPro camera, including mode, start film, stop film, take photo and battery level. This system is currently only compatible with GoPro HERO 7 Black. Triumph is continuing work to expand compatibility to additional GoPro models.

Triumph Turn-By-Turn Navigation Built with Google

The very first Google partnership with a premium motorcycle manufacturer – the Triumph turn-by-turn navigation system facilitates navigation through the My Triumph Connectivity module, which can be installed by your local dealer.

This great functionality will enable you to connect with hundreds of millions of places and businesses, and add up to 21 destinations along the route if required, with reliable, location-aware search suggestions. Once the rider has selected the route on the 'My Triumph' app and set-off, the instruments present clear graphic turn symbols on the TFT screen using icons, providing precise turn indications. This sophisticated navigation system gives riders a simple and easy way to set their route and find their destination, both on short and long journeys.

Phone & Music Operation

This functionality is facilitated through the My Triumph Connectivity module, enabling the rider to pair their smartphone and Bluetooth® headset to the My Triumph Connectivity System, providing full and intuitive control on the move. Phone functions such as making and receiving calls and SMS message notification can be controlled via the left hand switch cube, as can music track selection.

The Accessory My Triumph Connectivity System Includes:

- My Triumph Connectivity module
- Software update for the My Triumph Connectivity module
- Software update for the TFT instruments

(Installation will last approximately 60 minutes and will include fitting kit and software upload).

Facilitating the full functionality of the My Triumph Connectivity System, customers can also download the 'My Triumph' app on their phone:

- The 'My Triumph' app can be downloaded for free on Android™ and iOS™ compatible mobile phones. **Please note that the iPhone 11 and iPhone XR navigation function is NOT currently supported by the My Triumph Connectivity System. The current app supports iPhone 7 and newer models but as of this date, excludes iPhone 11 and iPhone XR models.** Triumph will continue to develop the app for compatibility with newer technology devices, but there is not currently a timeline for software updates by device.
- The core functionality of the 'My Triumph' app includes the following features:

1. Records your route, and at the end of your ride, displays a summary of your journey and allows for it to be shared with friends.
2. Live navigation, built with Google, displayed on the motorcycle's TFT instruments, facilitated through the My Triumph Connectivity system.
3. Monitors the status of the Triumph motorcycle, presenting key information such as odometer, average fuel consumption and time/distance to service, facilitated through the My Triumph Connectivity system.
