## 97 Car jerks/bucks or hesitates while driving DTCs P023400, P023500, P023600, P023700, and P023800 are stored in the ECM

97 20 73 2058976/2 April 10, 2020. Supersedes Technical Service Bulletin Group 97 number 20-71 dated March 19, 2020 for reasons listed below.

	Model(s)	Year	VIN Range	Vehicle-Specific Equipment
ſ	Q5	2018 - 2020	All	2.0 liter

### Condition

REVISION HISTORY				
Revision	Date	Purpose		
2	-	Revised header (Corrected Elsa display issue)		
1	03/19/2020	Initial publication		

#### **Customer states:**

• The vehicle feels as if it is hesitating, is low on power or is bucking/jerking while driving.

#### Workshop findings:

• A check engine light may or may not be illuminated in the instrument cluster.

One or more of the following DTCs may be stored in the engine control module (ECM), J623 (address word 0001):

- DTC P023400 (Turbo/Super Charger Overboost Condition).
- DTC P023500 (Turbo/Super Charger Boost Sensor A Circ).
- DTC P023600 (Turbocharger Boost Sensor (A) Circ. Range/Performance).
- DTC P023700 (Turbocharger Boost Sensor (A) Circ. Low Input).
- DTC P023800 (Turbocharger Boost Sensor (A) Circ. High Input).

Or

No relevant DTCs are stored.

### **Technical Background**

One of the pins or wires at the boost pressure sensor (G31) connector T4e may be backed out or broken due to the routing concept of the engine harness. When inspected, the harness is found to be too tight in the area of the sensor.

# **Technical Service Bulletin**

#### **Production Solution**

Routing concept improved in production.

#### **Service**

Due to the possibility of a no fault scenario OR the fact that some of these faults can occur with other root causes, it is advised to perform a quick inspection to the G31 connector before starting in depth diagnosis.

If one of the faults listed above is stored, inspect the wires at the G31 sensor.

It may be necessary to disconnect or de-pin the wires from the T4e connector to check for proper crimping and seating of the pins.

If there is damage to the pins or wire, repair the harness as needed (Figure 1). Ensure there is sufficient slack in the harness to prevent future issues.

If there are no issues found at T4e, please proceed with standard diagnosis.

Figure 1. T4e with damaged wire.

### U Note

Parts replacement does not solve this issue. Claims for replaced parts (e.g. turbocharger) will be subject to review.

#### Warranty

Claim Type:	<ul> <li>110 up to 48 Months/50,000 Miles.</li> </ul>
	G10 for CPO Covered Vehicles – Verify Owner.
	<ul> <li>If the vehicle is outside any warranty, this Technical Service Bulletin is informational only.</li> </ul>
