Applicability

YEAR(S)	MODEL(S)	ADDITIONAL INFORMATION
2021	Corolla, Corolla Hatchback, Corolla HV	

Introduction

Pre-Delivery Service (PDS) is a critical step in satisfying our new car customers. Customer feedback indicates the following areas deserve special attention when performing PDS:

- Careful inspection for paint chips/scratches and body dents/dings.
- Proper operation of electrical accessories (including interior light, clock, and radio reset).
- Interior cleanliness.
- Proper function of mechanical systems.

Customer retention and proper maintenance of vehicles are and have always been a major focus for Toyota. To help remind customers that regular service is essential to the proper maintenance of the vehicle, dealers are required to install a service reminder sticker before delivery. By doing this, customers will be reminded to return to your dealership for service. Your current service reminder sticker may be used. (See PDS Check Sheet item 8 of “Final Inspection and Cleaning.”)

This bulletin contains the PDS procedures which apply specifically to 2021 model year Corolla, Corolla Hatchback, and Corolla Hybrid vehicles. A universal PDS [Check Sheet](#) which contains PDS steps that apply to all 2021 model year Toyota vehicles has been developed. To properly perform a complete PDS, you must complete all procedures contained in this TSB as well as the universal PDS [Check Sheet](#).

In addition, if the vehicle is stored for over 30 days, be sure to follow [Long-Term Vehicle Storage Guidelines](#).

Warranty Policy

If the need for additional repairs or adjustment is noted during PDS, the required service should be performed under warranty. Reimbursement will be managed under the warranty policy.

The Warranty Policy and Procedures Manual requires that you maintain the completed Check Sheet in the customer's file. If you cannot produce a completed form for each retailed vehicle upon TMS and/or Region/Distributor audit, the PDS payment amount will be subject to debit.

An additional Repair Order completed in conjunction with normal PDS MUST have time punch/flags for service. If multiple repairs are performed, separate time flags MUST be punched for each repair.

- [Entune™ 3.0 App Suite Connect Initialization/Update](#) 8

*If applicable.

D/C Cut Fuse Installation

The D/C cut fuse (30A) has been removed at the assembly plant to reduce parasitic current draw in transit and storage. The removed D/C cut fuse (30A) is stored in the blank space of the relay block in the engine compartment. The D/C cut fuse (30A) **MUST** be reinstalled to the original location during PDS.

NOTE

This step is **ONLY** necessary on Japan produced vehicles (VINs starting with “J”) marketed in the continental United States, and on **ALL** vehicles in Hawaii, Puerto Rico, Saipan, Guam, and American Samoa.

2	Install D/C Cut Fuse (30A) (Original Location)

2021 Corolla, Corolla Hatchback, and Corolla HV Pre-Delivery Service (PDS)

Front and Rear Emergency Towing Eyelet Removal

1. If installed, remove the front and rear emergency towing eyelets from the front and rear bumpers by turning them counterclockwise.

NOTE

If it is difficult to loosen the front emergency towing eyelet, use a steel bar.

2021 Corolla, Corolla Hatchback, and Corolla HV Pre-Delivery Service (PDS)

Front and Rear Emergency Towing Eyelet Removal (continued)

- Place one of the removed emergency towing eyelets into the luggage tray in the luggage compartment.

NOTE

Dispose of the other removed emergency towing eyelet.

Front and Rear Emergency Towing Eyelet Hole Cover Installation

If not already installed, install the front and rear emergency towing eyelet hole covers stored in the glove box on the front and rear bumpers.

1. Insert the arrow-shaped part of the emergency towing eyelet hole cover A into the eyelet hole B as shown.
2. Install the emergency towing eyelet hole cover to the hole of the bumper.

NOTE

Make sure the front emergency towing eyelet cover is installed in the front, and the rear emergency towing eyelet cover is installed in the rear.

Front License Plate and Mounting Bracket Installation

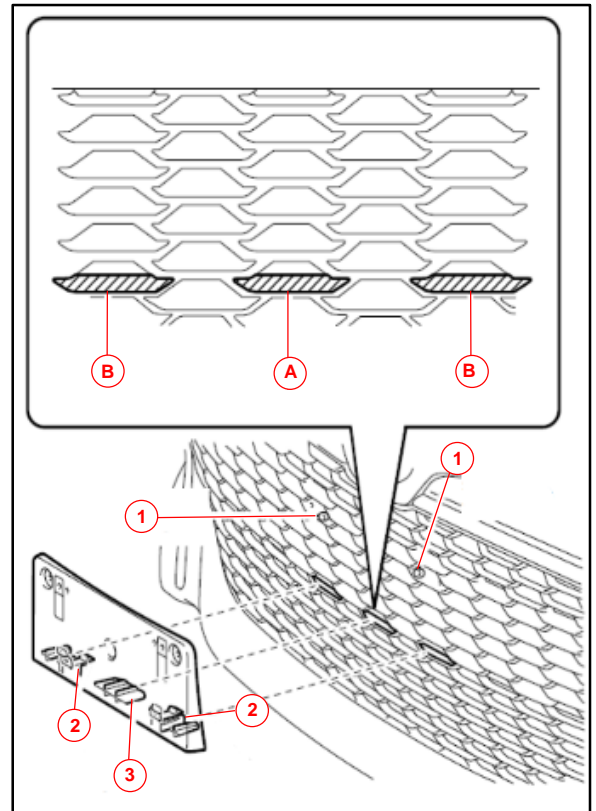

The front license plate bracket and two (2) self-tapping screws are loaded in the luggage compartment at the assembly plant. Follow this procedure to install the front license plate bracket and front license plate in states where it is required by law.

1. Install the bracket rib into area A of the grille and the bracket clips into area B.

2. Press the front license plate bracket onto the grille until the clips engage.

3. Align the holes on the front license plate bracket with the dimples on the front of the grille.

2021 Corolla, Corolla Hatchback, and Corolla HV Pre-Delivery Service (PDS)

Front License Plate and Mounting Bracket Installation (continued)

- Install two (2) self-tapping screws through the holes on the front license plate, bracket, and lower grille.

NOTICE

- Do NOT pre-drill holes into the bumper.
- Do NOT overtighten the self-tapping screws.

Tire Pressure Warning System (TPWS) Initialization

Refer to the applicable Repair Manual for the TPWS initialization procedure ([Corolla](#) / [Corolla HV](#) / [Corolla Hatchback](#)). Note the spare tire does NOT have a TPWS sensor.

NOTE

To adjust the tire pressure correctly when the outside temperature is significantly colder than shop temperature, perform a Health Check using Techstream and select the compensation tire pressure checkbox. Compensation pressures will display on the Health Check results screen. Adjust the tire pressure when the tires are cold.

Dealer Contact Information for Call Dealer Head Unit Function

Refer to the *Multimedia System Owner's Manual* to add dealer contact information ([pg. 72 for Premium Audio](#) / [pg. 74 for Audio Plus](#)).

NOTE

Premium Audio and Audio Plus ONLY.

Entune™ 3.0 App Suite Connect Initialization/Update

Refer to [T-SB-0039-20](#) *Initialize/update the Entune™ 3.0 App Suite Connect* to initialize/update the Entune™ 3.0 App Suite Connect.
