Sales Bulletin

HSB2020-05.08

Key Weekly Dealer Updates

May 8, 2020

NEW THIS WEEK

OEM Driver Assist Pre-Collision Option and Push Bumpers (REMINDER)

Back on our bulletin dated 2/11/20, we posted the following - "Last August, OEMs announced the Driver Assist Pre-Collision option. We reached out to the OEM to ask about how modifications to the front bumper, which such items as a push bumper, may affect the functionality of the Driver Assist Pre-Collision option. The OEM did not give definitive direction, but we were told these types of modifications may interfere with the camera and/or radar zone. Since we do not yet have a clear direction from the OEM on this subject, we have decided to pause these and similar modifications to the front bumper on chassis with OEM Driver Assist Pre-Collision until we have a better understanding and directive from the OEM. We are still actively working to obtain this information from the OEM and will provide an update when possible." We are re-posting this announcement because we have recently started receiving request to add Buckstop bumpers to chassis that have Driver Assist Pre-Collision Option. We have not changed our stance in regards to this option. Until OEM gives us clear guidelines on how to install these bumpers and not interfere with the Driver Assist Pre-Collision system, we cannot offer these types of options on chassis with the Driver Assist Pre-Collision Option.

Navistar/International Update

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

Currently struggling with axles shortages. Production start up is subject to change.

PREVIOUS WEEKS

Welcome to the Horton Family

Please help me welcome **ETR, LLC**, and **Mercy Sales, Inc** to the Horton family. ETR will represent Horton in the state of Florida while Mercy Sales, Inc will be representing Horton in the state of Michigan...or as Lance Randolph would say, the state up north. WELCOME to our family!

OEM (GM/FCA/Ford) - Chassis Production Update

Most automakers are now targeting May 18th to resume production at their U.S. factories after UAW officials raised concerns over earlier suggestions to restart earlier in May. We will continue to communicate information as it comes in to us.

Code 3 Dome Lights with Vital Vio Technology

We have been informed that the lead time on the Code 3 dome lights with Vital Vio Technology is now currently at 16 weeks with a minimum purchase of 100. If you have a unit in production and the customer wants to change his current dome lights to these Code 3 dome lights, you will need to go through our Parts Department to order them. Once the unit is finished in production, you will take delivery of the unit and swap these lights out once they are in stock and shipped to you. In regards to new units, with our current backlog/lead times, you can option/SR these lights in on any new orders.

Sub-flooring Material Change

As presented to the Dealer Principals on a call last Friday, April 24, we are making a change to our sub-floor material. Each dealership was shipped a 4"x4" sample for review. Please click [here](#) to review the letter that was sent with each sample with information on the new sub-floor. Timing of this change will be in the next few weeks once we use up some current inventory and are able to receive the new material to put in stock.

Ford Exhaust Tip on F-Series Chassis

It has been brought to our attention that Ford has stealth launch a 2020'MY change in regards to the exhaust tip. Please see photo below for your awareness.

Current Exhaust Tip

Horton Facebook Post - 2020 Horton National Show Unit

Our 2020 National Show Unit video is now located on the dealer portal under videos.

Dealer Interest Savings - May

Attached is a letter in regards to interest on prepayment of units. Please click [here](#) to review a full copy of the letter.

Horton Facebook Post - Please Share - 2020 Horton National Show Unit

Last week you may have noticed we shared a video of our 2020 Horton National Show unit. As I am typing this, the video has over 122k view, over 1k of some type of reactions, and pretty positive comments. If you haven't already done so, you will want to take a minute to review this video and possibly share

[Subscribe](#)[Past Issues](#)[Translate ▼](#)***Change to our Standard Threshold and Sill Plates***

In the weeks to come, you will notice a change to our threshold and sill plates standards. Please click [here](#) to review the PDF of a PowerPoint of these changes. Please review and get with me if you have any questions/concerns/comments on this change. (Last week for this notification.)

Remote Customer Inspection Process - Update

It has been discovered during the remote customer inspection process this week that the email link we send to you and your customer to get into OneDrive to review the Matterport, videos, and pictures cannot be forward to anyone else. This is a safety feature in OneDrive not to allow the information to be shared with others without us initiating it. Please make sure to communicate with us who you want to receive the link. If you need to add someone to that list, please let us know, and we will add them. (Last week for this notification.)

OEM (GM/FCA/Ford) - Chassis Production

It has been requested that all OEM's prioritize ambulance & fire chassis when they go back into production, which we are hearing will be Monday, 5/4. We have not heard anything official as of yet, but we have heard through some of the back channels that the OEM's are planning on doing that. The OEM's start date of 5/4 is all depending if the employees actually come back to work. There have been some comments that the employee's union may feel this is too soon for employees to come back. Once we have additional information, we will share it. (Last week for this notification.)

FCA (RAM) Chassis Production Update

FCA's Saltillo Truck plant that manufactures the RAM 4500 & 5500 chassis is scheduled to come back on line on Monday, 4/27. Please note this is subject to change pending employees due return as scheduled. (Last week for this notification.)

Freightliner Chassis Production Update

Freightliner's US truck plants did open back up on Monday, 4/20. They are not sure when the Mexico plant is going to open. Possibly Monday, 5/5. Freightliner receives all their frame rails from Mexico, so if they don't reopen on 5/5 there will be in impact on the US truck plants. Once we have additional information, we will share it. (Last week for this notification.)

OTHER INFORMATION***Lead Time Update***

Current production schedule: the next available production slot has a completion date during the week of 1/11/21. Our current lead time is 250 to 275
