# Service Campaign T4W Dealer Best Practice

Date: May 11, 2020

Attn: Dealer Principal/General Manager/Service Manager/Parts Manager

Subject: Service Campaign T4W: Sonata Hybrid (LF HEV) Air Filter and NVLD Replacement (TSB #20-01-020H) – v1

Updates To This Document	Date
<ul style="list-style-type: none"> <li>Initial communication to dealers.</li> </ul>	05/11/20

## \*\*\* Dealer Stock and Retail Vehicles Only \*\*\*

Dealers must perform this Service Campaign on all affected vehicles prior to customer retail delivery and whenever an affected vehicle is in the shop for any maintenance or repair.

### Affected Vehicles

Hyundai is conducting a Service Campaign to install a new Air Filter Kit with an updated filter to help prevent entry of the salt particulates on certain 2016-2019 Sonata Hybrid (LF HEV) vehicles.

The affected vehicles include:

- Certain 2016-2019 Sonata Hybrid (LF HEV)

Hyundai is initiating this action to ensure the quality of its vehicles and the continued satisfaction of Hyundai customers.

### Description

Some vehicles may experience check engine light on with the following DTC found stored:

- DTC P0456 - Evaporative System (EVAP) - Very Small Leak

These conditions primarily occur in the California coastal areas that are subject to marine layer cloud cover. Salt particulate deposit can form inside the Natural Vacuum Leak Detection (NVLD) sensor which may cause intermittent operation prompting the DTC P0456 and check engine light.

This service campaign provides the procedure to install a new Air Filter Kit with an updated filter to help prevent entry of the salt particulates.

In addition, replace NVLD sensor if DTC P0456 found stored in the Engine Control Module (ECM).

### Service Action

**Reservation** – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and advise the customer on time requirements.

**Readiness** – Review this announcement and the accompanying FAQs with all Service and Parts staff including Reservationist/BDC. Also, complete all applicable training, check your reservation capacity settings (you can set separate capacities for every recall/campaign), confirm email addresses for campaign appointments, and that you have all necessary tools, campaign parts and shop equipment as needed.

**Reception** – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and print a copy for technicians. Provide SRC or an alternative vehicle, as needed. If a customer has declined the campaign, note this on the repair order and request the customer's signature next to the statement.

- Eco-friendly vehicle owners should be provided an equivalent eco-friendly SRC, or alternative transportation, as needed.

**Hyundai**  
Assurance Car Care

**Repair** – Always plug in the GDS before starting the repair. Make sure to complete an MPI on all vehicles and Quality Control your work.

- Use Greeters, Porters and Service Consultants to bring vehicles to Technicians to make it easier for them to stay working in the bay.
- Check for DTC in ECM. Is P0456 (Active, Pending, or History) stored?
  - Yes – Replace Air Filter Kit, Replace NVLD and Perform GDS-M EVAP Leakage Test
  - No – Replace Air Filter Kit and Perform GDS-M EVAP Leakage Test

**Return** – Review all completed campaigns and repairs to answer any customer questions. Also, schedule the customer's next service.

**Reconnect** – Follow up for customer satisfaction.

### Parts

Please review parts as outlined in the corresponding TSB (TSB #20-01-020H).

### Customer Notification

None

Thank you for your prompt attention to this important matter and continued commitment to Hyundai customers.
