SVM - Specified/actual comparison

## Information to the field:

Lamborghini informs that the use of the "SVM - Specified/actual comparison" function, present in the section "Special Functions" of ODIS Service, is not necessary for Urus vehicles since its execution may lead to an incorrect configuration of the control units present in the car. It is therefore recommended to ignore it.

For information about the general use of the SVM functions please refer to the Workshop Manual.

Please contact your Area Manager for any additional information.
