Lamborghini Connect Vehicle Tracking System activation

Lamborghini Connect Vehicle Tracking System activation

Information for the field:

Lamborghini reminds that all Urus MY20 equipped with the LCVTS (Lamborghini Connect Vehicle Tracking System) needs that:

- the dealer check:
 - the customer downloaded UNICA App (further details in the “Connectivity Book of Knowledge” - Chapter.9)
 - the customer registered his account in UNICA APP (further details in the “Connectivity Book of Knowledge” - Chapter.9)
 - the customer enters the pairing code in the Lamborghini Infotainment System. (further details in the “Connectivity Book of Knowledge” - Chapter.6)

The “Connectivity Book of Knowledge” and all the necessary documentation are available in the Lamborghini HUB (Models > Connected car > Urus > Connectivity MY20).

- the dealer execute specific functions via ODIS Service during the Pre-Delivery Inspection:
 - “19 - Driver card adaptation”

IMPORTANT:

- Both the 2 driver card those are in the car must be adapted.
- The 2 driver cards are inside the glove compartment.
- The driver cards are not available only in USA and Canada where this function has not to be executed.

- “19 - VTS Certificate enabling (only for Europe and UK)”

These functions are available in ODIS Service, in the “Special functions” tab, and they are described in the Lamborghini Workshop Manual in:

10 Diagnosis/19 Gateway electronics/Guided functions - Additional adaptations/Description.

IMPORTANT:

- **If the functions above are not executed, the LCVTS does not work.**

Lamborghini reminds that all the necessary information about the complete activation process is available in the Lamborghini HUB (Models > Connected car > Urus > Connectivity MY20).

For any other problems relating to the above-described functions, please contact us at odis.support@lamborghini.com and refer to the information provided by the Lamborghini Technical Support.

Yours sincerely,
Customer Service
