Product Change Notice - New latch, latch plate and slider for LH entry door screen doors

Dear Valued Customer:

We are pleased to announce the addition of an improved door latch, latch plate and slider panel for left-hand entry door screen doors, starting on or around June 15, 2020. This improvement was made for all other entry door screen doors in August, 2018. (Please note, to expedite the release of this product change notice, photos depicted are right-hand doors.)

The new latch (Fig. 1) has a handle on both sides, which eliminates the need to open the screen door slider panel to exit the trailer. The new handle snaps over the screen door frame in an L shape for a tight fit and added durability. Installation includes two screws (Fig. 1A). A new latch plate (Fig. 2) has also been added to match the new latch.

The plastic slider panel has also been updated (Fig. 3). The new slider fits with the latch and since it does not need to be used to activate the screen door handle, the plastic "bubble" (Fig. 3A) has been eliminated for improved aesthetics.

The current and new LH part numbers are:

- 2020101699 – Latch (left)
- 20200445611 - Slider Panel - Black (left)

Fig.1

CURRENT: Screen door handle.

**NEW: Screen door handle:
Outside of screen door (top) and
inside of screen door (bottom).**
