Case Number: S2008000065

Release Date: 05/05/2020

Symptom/Vehicle Issue: Fuel Level Indicator Does Not Display A Full Reading Immediately After The Tank Is Filled

Customer complaint/ technician observation: Owner complains the fuel gauge reads below full as shown just after the tank is completely filled. Technician observed a similar concern shortly after filling; no active DTC's listed.

Discussion: The condition described above has been identified on some vehicles. Do not attempt to repair or replace parts, the current parts will perform in the same manner. Driving the vehicle will allow the fuel gauge indicator to reposition to the most current fuel level after a fill-up.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
