

STAR ONLINE PUBLICATION

Case Number: S2008000066

Release Date: 05/07/2020

Symptom/Vehicle Issue: LED Front Fog Lamps Flicker, Intermittently Illuminate, Operate Dimly Or Not Illuminating

Customer complaint/ technician observation: The customer may complain the front LED fog lamps flicker, intermittently light, are dim or inoperative. Technician observed upon scanning DTC's U11E9 or B16FB-15.

Repair Procedure: Inspect the fog lamp connectors at the lamp and any involved inline connectors. Verifying the connectors were fully seated and engaged and inspect internally for any signs of corrosion. To verify, disengage, inspect, clean or replace the connector (s) as needed.

16 Way Black Connector

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
