Case Number: S2023000027

Release Date: 05/15/2020

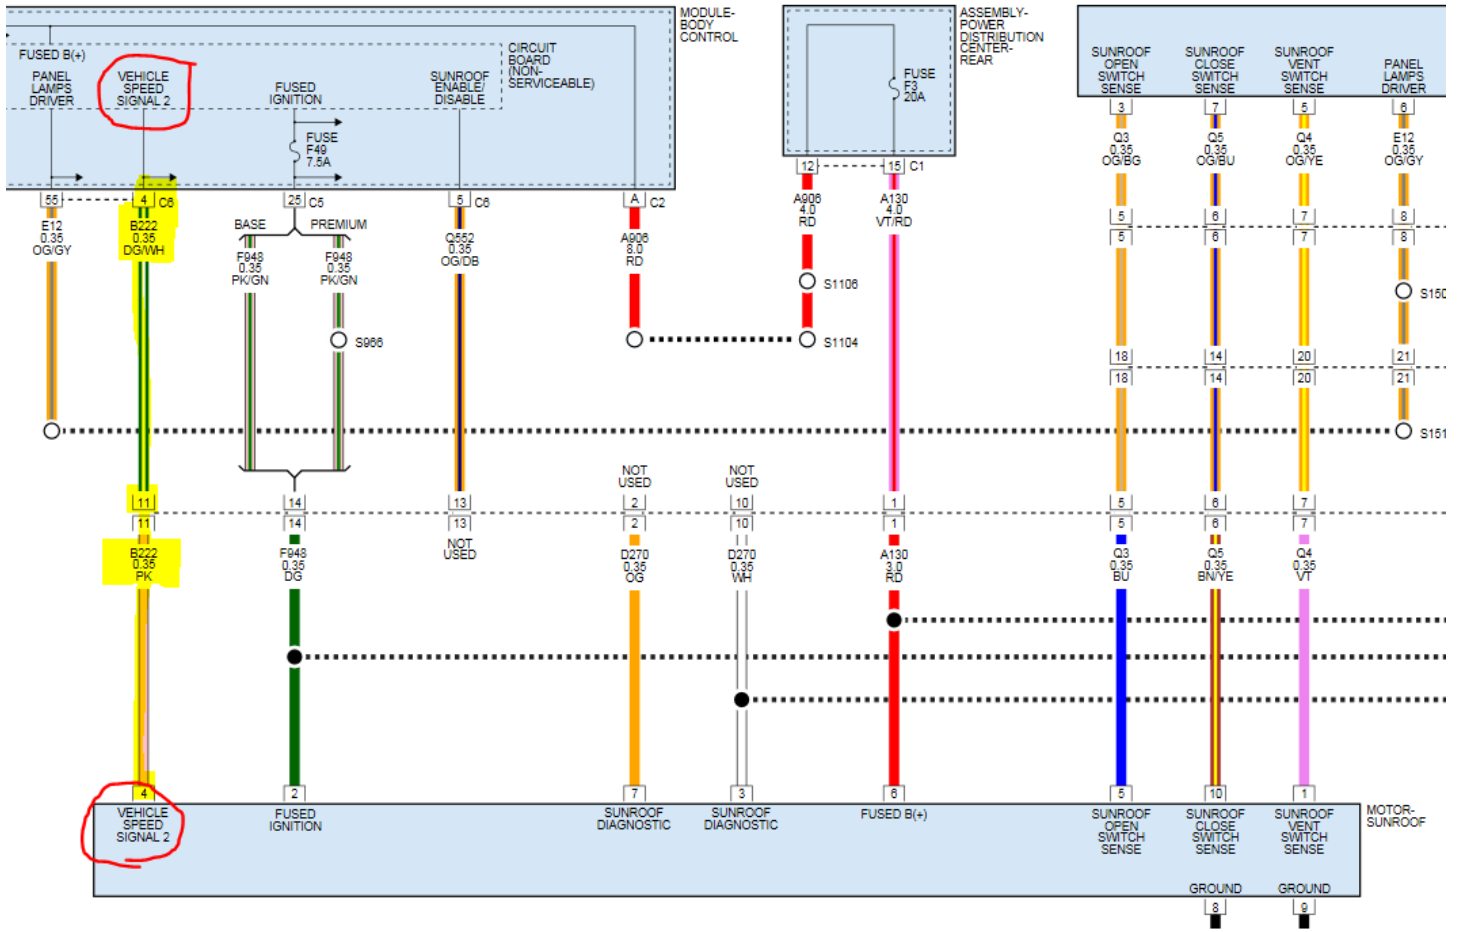

Symptom/Vehicle Issue: Speed Signal Circuit Function For Dual Pane Sunroof

Discussion: The sunroof uses the speed signal to adjust the anti-pinch values when closing the glass to prevent false reversals. Values are changed at different speeds so the sunroof doesn't think the wind blowing across the roof is an obstruction. The sunroof remains operational at all speeds. Circuit B222 shown below.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
