2. With the engine turned off, disconnect the oil control valve located on the lower backside of the engine block (NOT the OCV located on the cylinder head) and inspect for poor pin fits or loose connection. Is the Oil Control Valve connection loose or have poor pin fit?

- Yes: Repair, then go to step 3.
- No: Go to step 3.

3. Perform engine oil pressure inspection using the DataLogger PIDs and document the pressure readings and RPM on the repair order and warranty claim. **NOTE**:

- *It is critical to keep RPM within the specified range when measuring the oil pressure.
- Use an external cooling fan or turn on the heater and set the fan speed to high to maintain engine coolant/oil temperature.
