

**THIS TAG ONLY TO BE REMOVED
BY TRAILER OWNER.**

WARNING

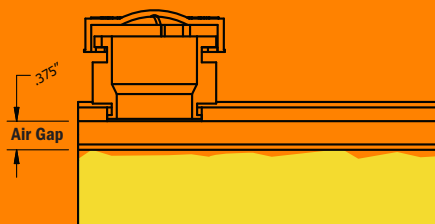

Only use a maintained battery with no less than 12.5v (see battery chart). Testing with a battery charger or other device will cause loss of function.

% Battery Charge Chart

WARNING

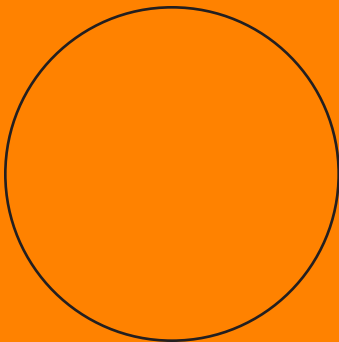

Do not overfill fluid reservoir. Fluid will expand. Max fill level is 3/8" below bottom of filler neck.

WARNING

Only use new brake fluid from a sealed container. Failure to do so may induce debris and cause premature failure.

**FLIP TAG OVER FOR ADDITIONAL
BRAKERITE® INFORMATION**

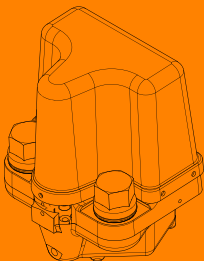

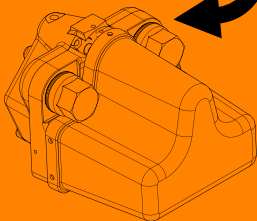

FOR BRAKERITE E/H ACTUATOR ONLY

WARNING

In some cases, the BrakeRite may not build pressure right out of the box. During the first activation it may be necessary to place the unit temporary on its back to bleed the air out of the unit. This is only required during the first time it is installed. See example orientation below. Once the unit builds pressure return it to its normal upright orientation.
