K83/K84_clutch

US 65439876-01 - 6/18/20

Complaint:

Exchange of clutch components
Clutch judders / closes with a jerk

Cause

Clutch - exact cause not yet known

Measure

No replacement parts are available for the clutch currently installed (see "old version" image).

In the event of a complaint, where clutch parts must be exchanged, ALWAYS check first which clutch is currently installed (see "old version" or "new version part number 8565058" in attachment). If the "old version" is installed, the entire clutch must be replaced as a one-off.

For the removal, please choose the K83/K84 repair instructions or those provided with the vehicle identification number:
"Install/remove or replace clutch".

The new clutch to be installed, part number 8565058, is identical to the clutch in models K80/K81/K82. The new clutch is installed according to the installation instructions for a K80/K81/K82 clutch under "Remove/install or replace clutch". As of August 2020, these installation instructions will also be available for K83/K84 in AIR.

CAUTION!

No exact delivery date for the complete clutch 8565058 is known as yet. The individual parts can also be ordered in an emergency. You must ensure that the complete parts scope in picture panel 21_0315 (without pushrod 8565064) is installed, i.e. in detail:

8356980 Clutch housing

9444590 Clutch set

8406744 Bearing set

8392359 Clutch nut

and

7700396 O-ring for oil drain plug of crankshaft

8393581 2x sealing rings for clutch cover

The removed "old version" clutches will be requested via the research team and must be sent in as quickly as possible when requested!

The exchange of the complete clutch can be invoiced under warranty as a one-off as a result of the change:

Defect code: 21 21 00 55 Clutch jerking

Flat rate units: 10 FRU for 21 21 000 Remove/install or replace clutch

(or 9 FRU for +21 21 606 Remove/install or replace clutch, if the work is done in conjunction with other works)

8565058 Complete clutch set (or until the above-named individual parts become available)

7700396 Sealing ring for oil drain plug of crankshaft

8393581 Sealing rings (2) for housing cover on right
