Involved Region or Country	North America, Europe, Middle East, Korea, China, Australia, New Zealand
Additional Options (RPO)	IOU or IOT
Condition	When the vehicle is first started, or when Navigation is first launched, the radio may display Navigation Loading, may show a scrolling circle, or may only show the home bar at the bottom of the display.
	<div></div> <div></div>
Cause	Engineering is investigating the condition to identify a root cause.

Correction:
: Verify condition is as described and recovers with the work around method.

Service Procedure

Reproduce the condition at ignition on/engine start. Verify the condition is present, then perform the following steps:

Go to Home screen > Settings > System > Running Applications

Select the “Stop” button on the “Navigation” application line, then select OK. This will force the application to restart.

Launch navigation from the Home page.

If the navigation still will not launch, then this PI does not apply. Refer to SI for diagnostic procedures.

If the navigation recovers for that ignition cycle, then please explain to the customer that engineering is investigating this condition. This PI will be revised or replaced with a bulletin once a root cause is identified.

Parts Information

Do not replace any parts for this condition.

Warranty Information

Labor Operation	Description	Labor Time
3487088*	Confirm Navigation Loading Condition	.3
*This is a unique Labor Operation for Bulletin use only.
