

WLH5 Workshop campaign - Checking plug connection for water drain hose and connecting it correctly if necessary

Version 1

WLH5 Workshop campaign - Checking plug connection for water drain hose and connecting it correctly if necessary

Overview

There is a possibility that the condensed water drain hose was not fitted correctly on the heating/fresh-air unit on the affected vehicles.

As a result, condensed water can escape into the right footwell when using the air conditioning.

To prevent this, the water drain hose on the heating/ fresh-air unit must be checked, then fit correctly if necessary.

Model line	Taycan (Y1A)
Model year	2020
Number	6,582

Warranty processing
