PuMA measure

## RR1/2/3 Series I - ISTA/P 67.x requests CAS is removed before programming

UR-V-2 65490062-02 - 8/24/20

### Complaint:

When attempting to program a RR1/2/3 vehicle type, ISTA/P will request the CAS control unit is removed.

---

### Cause

Under investigation

---

### Measure

When ISTA/P prompts to remove the CAS control unit, tick the box "Modification Complete"  
This will then allow the programming session to continue as normal.

Note the CAS must remain connected at all times and replacement of the CAS is not needed!

Please submit a TSARA case for further support if needed

---

### Validity information

Model series:	[RR1, RR3, RR2]
Engine range:	[ALL]
Body style:	[ALL]
Fault codes:	[]
Production period:	-
