RUBICON EXPRESS
TECHNICAL UPDATE

DATE	3/18/20
APPLICATION	18+ Jeep JL/JT
PART NO.	JL7134/JT7134 2.0" Kit

TECHNICAL ISSUE

There has been a revision to the OE Jeep JL/JT coil isolator (68253406AB is now 68253406AC) which added material and additional rigid plastic has been added to the OE isolator. This change to the isolator does not allow for the isolator to fit easily onto the 86-RM31140 provided with the JL7134/JT7134 kit. The part numbers are marked on the OE isolators and another way to tell the difference is the isolator pins are rigid and the non-chamfered OE diameter.

CORRECTIVE ACTION

The current inventory of 86-RM31140 will require a sanding 0.5" X 45^0 chamfer around the internal diameter of the isolator 68253406AC to properly fit onto 86-RM31140. This chamfer will go into the rigid plastic to make it clear the outer diameter on 86-RM31140. Proper personal protective equipment must be worn during the sanding operation. See photos on page 2. Engineering is planning to release an updated version to manufacturing in the next two weeks and production parts should be released from manufacturing 90 days after that.

EXPECTED CORRECTION TIME

- [x] CORRECTED. SEE CORRECTIVE ACTION (ABOVE)
- [ ] 14 DAYS
- [ ] 30 DAYS
- [ ] 60 DAYS
- [ ] 90 DAYS

REQUIRES PART NOTE IN ISIS

- [ ] YES
- [x] NO
