

# SAFETY RECALL W46 12-VOLT ISOLATOR POST CONNECTION

## Parts Ordering

AUGUST 2020

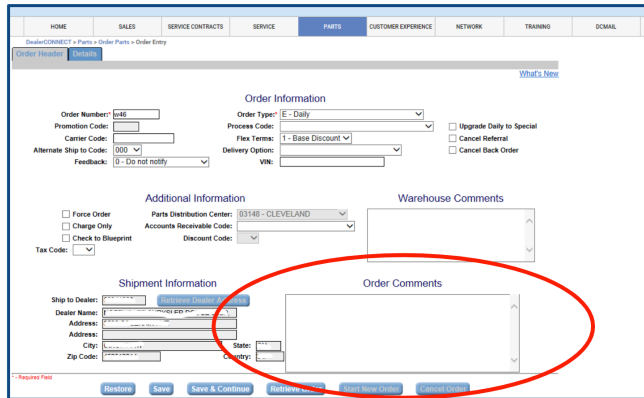

In some instances as per the Dealer Instructions for Safety Recall W46, the 12V cables and isolator post may need to be replaced. If needed, please note that as per the instructions on page 16 the VIN and RO number must be noted in the comments section of the parts order. See below for details. Orders missing this info will NOT be filled.

**C. 12-Volt Cables Replacement**

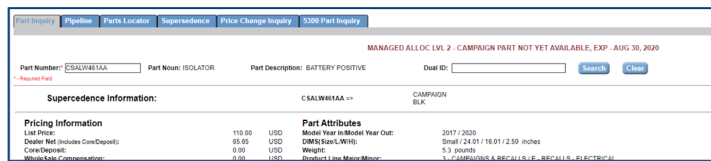

**NOTE: Section C is applicable ONLY for vehicles requiring 12-volt cables replacement due to cable terminal showing signs of corrosion, oxidation, tarnish, discoloration, dirt, debris, and / or lime as illustrated in (Figure 20).**

1. Order the cable and isolator kit.

**NOTE: When submitting the Order Entry for this part, the VIN and Repair Order number MUST be included in the comment section.**

NOTE: You may see the below message during parts ordering for the isolator kit. Please disregard as this is simply a place holder message, if the Instructions above are followed parts will be released.
