September 2020

RE: 2021 ADV150 - Missing EM Coupler (SB: ADV150 #1)

Dear Honda Dealer:

Honda is launching a **Product Update Campaign** on **CERTAIN** 2021 ADV150 motor scooters to supply the EM Coupler that is missing from the tool kit. As outlined on page 109 of the Owner's Manual, the motor scooter should have come equipped with this part. During production at the factory, the EM Coupler was omitted from the tool kit.

The EM Coupler can be used to unlock the ignition and start the engine in the event the Smart Key is lost or malfunctions. Please refer to the Owner's Manual pages 109-111 for instructions on the use of the EM Coupler.

The EM Coupler(s) will be auto-shipped to your dealership based on your inventory. Please store the EM coupler in the tool kit located under the seat.

The EM Couplers are being mailed directly to customers based on current sales registration information.

If you have recently sold this unit to a customer, please contact the customer and provide the EM Coupler to them. Please instruct the customer to store the EM Coupler in the tool kit and to refer to the Owner's Manual for instructions on its use.

SERVICE BULLETIN

Service Bulletin: ADV150 #1, which includes all of the information relating to this Product Update, is now available on **iN** by navigating to **Service>Service Publications>Service Bulletins** or by clicking [here](#).

Make sure all departments in your dealership are aware of this action.

If you have any questions, please contact AHM TechLine through TechLine Connect on **iN** or contact your District Service Manager.

Sincerely,

American Honda Motor Co., Inc.

Powersports Division
