Vehicles affected: P22: GT

Location: Electrical - Window Lift

Concern: Windows raise by themselves when battery low

Condition: When battery level low

Diagnostic Trouble Codes

N/A

Measure

McLaren have identified that if a P22 battery level drops below 15% whilst the doors are open, the windows will rise by themselves to the 'closed' position. Under this condition, if the door is then closed, there is a hard clash between the upper edge of the window glass and the bodywork causing potential damage to the window glass or bodywork. In order to avoid this condition, ensure vehicles remain on charge if the doors are to be left open for an extended period of time.

Note: This issue has now been fixed as part of the PF4.5 SW update.
