Check Engine Lamp with DTC P0420-00

14-17MY RR Evoque and Discovery Sport

Customer Voice:

- The Check Engine Lamp is illuminated.

Technical Description:

- DTC P0420-00 is stored and the catalytic converter requires replacement.

Status:

- Repeat replacements have been caused by the vehicle being operated in over-run during the warmup phase.
- A revised PCM calibration has been released to mitigate the risk of repeat repairs and is available as of SDD 159.07.
- When a catalytic converter is replaced due to DTC P0420-00 being stored, ensure the PCM is updated in parallel.
- The TOPIx Workshop Manual DTC help text will be updated shortly to include the PCM update instruction.
